### **DETAILED ACTION**

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

2. The abstract of the disclosure is objected to because all numeral callouts should be enclosed in parenthesis. Correction is required.

### ***Drawings***

3. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "11" has been used to designate both "female screw portion" in fig. 2 and "thick walled portion" in fig. 5. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

Art Unit: 3683

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "rubber-like" in line 3 and line 10. It is unclear as to what products are considered as "rubber-like" by the Applicant. It is recommended that Applicant delete the phrase "rubber-like" from the claim.

Claim 1 recites the limitation "the body frame side" in line 32. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the vibration generator side" in line 33. There is insufficient antecedent basis for this limitation in the claim.

Claim 1 recites the limitation "the body frame" in line 34. There is insufficient antecedent basis for this limitation in the claim.

Claim 2 recites the limitation "the axis center" in line 3. There is insufficient antecedent basis for this limitation in the claim.

Claim 3 recites the limitation "may be situated" in line 5. It is vague and indefinite if element is included or precluded.

Art Unit: 3683

Claim 4 recites the limitation "may abut" in line 5. There is insufficient antecedent basis for this limitation in the claim.

Claim 5 recites the limitation "formed in a residual space of a space" in line 3. It is indefinite and unclear what Applicant is conveying.

Claim 7 recites the limitation "may be situated" in line 3 and lines 5-6. It is vague and indefinite if element is included or precluded.

Claim 6 is indefinite due to its dependency on claim 1.

### ***Double Patenting***

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 3683

7. Claims 1, 2, and 4 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 2, and 4 of copending Application US 2005/0200060. Although the conflicting claims are not identical, they are not patentably distinct from each other because subject matter limitations in claims 1, 2, and 4 of copending Application US 2005/0200060 encompass the claimed subject matter limitations in claims 1, 2, and 4.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
